QUALITY FESTIVAL CONFERENCE

May 24th – 27th 2023, Kragujevac, Serbia

Conference trip 25.05.2023.

The **Oplenac Mausoleum**, located in Topola, Serbia, is a remarkable testament to the country's rich cultural heritage and history. The mausoleum was built as a tribute to the Karadjordjevic family, who played an important role in Serbia's history. The Church of Saint George that is part of the complex was built by King Peter I of Serbia in the early 20th century to honor his ancestors. The church was designed by architect Nikola Nestorovic and is a stunning example of Byzantine-style architecture, with intricate mosaics covering its walls and ceilings.

The construction of the mausoleum began in 1910, following the death of King Peter I. The mausoleum was built on a hill overlooking the church and the town of Topola. It was designed by the Russian architect Nikolai Krasnov. The mausoleum's striking white marble exterior was imported from Italy, and the interior is decorated with more than 40 million tiny mosaic pieces. The mosaics depict important events from Serbia's history, including the Battle of Kosovo and the First Serbian Uprising, as well as scenes from the lives of the Karadjordjevic family. The mausoleum was completed in 1930 and contains the remains of several members of the Karadjordjevic family, including King Peter I and his wife, Queen Ljubica. It has become a symbol of national identity and is an important pilgrimage site for Serbs around the world.

The **House of King Peter I** was built in the early 20th century as a summer residence for King Peter I of Serbia and his family. The house features a beautiful garden, with fruit trees and flowers, which was a favorite spot for the king and his family to relax and enjoy the fresh air. The interior of the house is decorated with period furniture, paintings, and other artifacts, offering visitors a glimpse into the life of Serbian royalty in the early 20th century. During World War I, the house served as the headquarters for the Serbian army, and it was badly damaged during the war. However, the house was eventually restored and is now a museum that showcases the rich history and culture of Serbia.

The **King's Winery**, built in 1931 on the French model, is a well-preserved example of a modern wine-cellar. It has a ground floor and two underground floors, with a constant temperature of 8°C, and 99 oak barrels. The museum exhibition displays some of the oldest bottles and equipment used in wine bottling. The winery also has archive wines, including Oplenka, Žilavka, White Burgundy, Prokupac, Hamburg, and Plemenka, with uniquely shaped bottles and the Royal coat of arms. After neglect in the post-WWII period, the Oplenac vineyards were renovated in 2000, with the first harvest in 2006. Today, wines from the King's vineyards are again served worldwide.
